

## Our Solar Watt Solutions Honesty Guarantee for Home Owners

Solar Watt Solutions has been dedicated to solar more than 10 years. Our top priority is always doing what is right for the customer and we base all our business practices with this in mind. This starts with our Honesty Guarantee which includes:

- **25-year 100% solar production guarantee** of the solar energy estimate in your proposal.
- **8-week Installation Guarantee\*** - Our processes are optimized to get you installed and turned on quickly. We average just 6-8 weeks from signing to solar turn on. If your system is not installed and turned on within 8 weeks of signing up with us, we will pay you what your solar would have saved you every day we are late.
- Honest answers to all your questions whether you buy from us or not. We feel our job is to educate you so you can decide for yourself whether solar is right for you.
- Highest quality solar panels, inverters, and racking. We only install the same equipment that we install on our own homes.
- All systems are custom designed and we won't present a proposal until we have actually been to your house.
- **25-year Workmanship Warranty**
- **Solar Watt Solutions GIVES BACK** – We donate solar light systems to 5 families in Africa for each new solar system we install. 10 children can now study and read at night. Converting from kerosene lamps to solar lights leads to better health, 5000 extra hours of study time, and \$1,050 in cost savings.

We pride ourselves on making the customer experience positive from the first time we meet through the 25+ years you own your solar system. We know it's a big decision and we want you to be comfortable and happy through the entire process. At Solar Watt Solutions your solar turn on day is the just the beginning of our partnership. This is our Honesty Guarantee to you.

Sincerely,

David Watt
